- 10 - Small Screw (x4)
- 11 - Small Lock Nuts (x2)
- 12 - Springs (x2)
- 13 - Zip-Ties (x4)

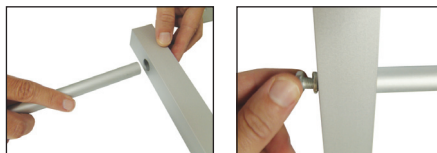

Step 1

Take all parts out of the box.

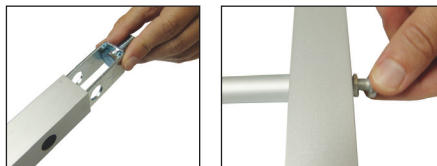

Step 2

Lay the Vertical Bars (x2) on a clean, flat surface, with the large holes facing one another. Insert the ends of only one Horizontal Pole (3) into the holes at one end of the Vertical Bars (2). Place a Small Lock Nut (11) on each of two Small Screws (10), feed the Small Screws (10) into the small holes in the Vertical Bars (2) and into the ends of the Horizontal Pole (3). Tighten until secure.

Step 3

Insert the Flanged Screws (9) into the other end of the Vertical Bars (2) until the holes align. Insert the second Horizontal Pole (3). Place a Small Lock Nut (11) on each of two Small Screws (10) and tighten the screws into the holes in the Vertical Bars (2) until secure.

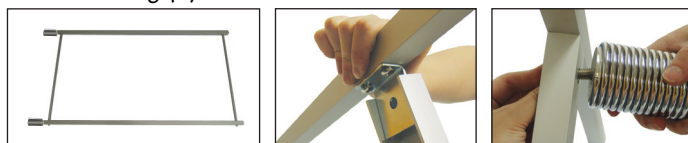

Step 4

Screw the Springs (12) onto the Flanged Screws (9).

Step 5

Stand the assembled frame on its side. Slide the metal plate on a Leg (1) into the recessed underside of the Base Crossbar (4), align the hole with the hole in the Spring (12), and fasten in place with a Large Screw (7) and Large Lock Nut (8). Repeat with the second Leg (1).

Step 6

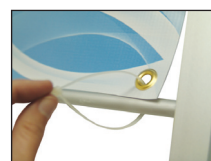

Place an End Cap (5) into all open ends of the Vertical Bars (2) and Legs (1). Peel the protective layer off of the adhesive backing on the Rubber Feet (6), and adhere them each to the underside of the ends of the Legs (1).

Step 7

For 2 Small Banners:

Be sure that all four corners of the Banners are grommeted. Holding both Banners together, use the Zip-Ties (13) to secure the Banners to the stand.

For 1 Folded Banner:

Be sure that all four corners of the Banner are grommeted. Fold the Banner over the top Horizontal Pole (3), align the grommets, and use the Zip-Ties (13) to secure the Banner to the stand.
